

Celebrating π (pi) in 2015

Saturday, March 14, 2015

March, 2015						
Su	Mo	Tu	We	Th	Fr	Sa
22	23	24	25	26	27	28
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31	1	2	3	4

9:26:53 AM

**On Saturday, March 14, 2015, at 9:26 a.m.,
this number sequence formed
3.1415926...**

(the century's longest starting group of pi's infinitely long decimal)

All around the globe, in the various time zones, that moment would be a fine time to eat pie for International Pi Day! The image above shows pi built of the 12 pentominoes and a screen capture of the moment, including even seconds, making nine places. Below see pi to 2156 places as color blocks, designed by Robert Vermillion and printed on shirts by Kate Jones via Café Press. We'll be wearing them on pi day. No more 7 (9) digits for 100 years!
